

K-Love radio (88.1, 91.9, 88.9 in my area serves me with uplifting family programming not found on most other radio stations in my area. It would be a great loss for our local community to lose this station on any of the above frequencies. Please do not force this station off of the air by allowing LPFM stations to take priority over current FM translator service in my area.

If K-Love were to be taken away there would be a loss of a great source of uplifting and spiritually filled programming. The community and our country needs this type of programming in these and the days that follow. Please do not force this station off of the air by allowing LPFM stations to take priority over current FM translator service in my area.

I believe that the service provided by K-LOVE serves the public interest in giving it a positive rather than negative attitude to life and to what people as well as our great country can do if we stand true to God and his word. Please do not force this station off of the air by allowing LPFM stations to take priority over current FM translator service in my area.
